# ONLINE BIDDING NOW AVAILABLE

Simply Download the **MartEye App** from your phone App Store & Register.  
Then press the **Request to Bid** button on the **South East Marts** page.

ALSO AVAILABLE ON WEBSITE:

[southeastmarts.marteye.ie](https://southeastmarts.marteye.ie)

## How to Bid

We advise any interested parties to make arrangements with the Vendor of the Lot/s of interest to view the lot/s prior to the close of the sale.

Register to Bid on the Mart Eye App/Website , South East Marts will need to approve your bid so please register in good time.

Please call on 01323 844874 or 07890 359622 if you are awaiting approval.

## Getting Set Up with Mart Eye

1. Download the Mart Eye App and search for South East Marts or go to the MartEye website, southeastmarts.marteye.ie.
2. Submit a request to bid, this will require you to input your details, please enter a mobile number and email otherwise you may not be approved , South East Marts will need to approve the request, so please do this before the Sale starts.

## The Sale

You may bid on any lot, anytime during the online auction. The bidding starts at 5pm Wednesday 12th March. Lot one will close at 5pm on Thursday 13th of March, followed by Lot 2, and so on. There is an **ANTI-SNIPING** mechanism to allow fair bidding, meaning if a bid is placed in the last 1 minute of the close time the timer on that lot will increase for another 1 minute to allow others to bid.

Once Lot 1 closes, Lot 2 will then go onto the final minute and close next.

You can set a **MAXIMUM BID** on a lot which will allow the platform to automatically bid on your behalf at the lowest increment possible up to that value. If your Maximum bid level is below the reserve it will automatically take that value.

**QUICK BID**, allows you to bid at the next minimum bid, this is useful as the sale closes.

Once the auction is complete the platform will display if you are the winning bidder. If you have been successful you will be contacted by one of the South East Marts team to proceed with the details of the sale.

If you need any help getting set up please call South East Marts and we will help you through the process.

If you are successful purchasing a member of South East Marts will contact you once the sale has finished.

## Conditions of Sale

This Sale is held under the Conditions of Sale of the Livestock Auctioneers Association which are displayed at Hailsham Market and available upon request from the Mart. All lots will be sold in guineas. All bulls under 5 years of age are subject to an upset price of 3000 guineas.

Successful purchasers must collect their purchases within seven days of the sale closing, unless prior arrangements have been made.

**ONLINE CATALOGUE AVAILIABLE TO VIEW ON MARTEYE**  
**Including pictures and videos of each lot.**

Signet Breeding Services and the Sussex Cattle Society have developed a breeding initiative that enables anyone in the Sussex Cattle Society to access Signet's range of online services. As part of the initiative with Signet, the Sussex Cattle Society will fund the recording costs of any Society member that has paid their capitation fees; effectively removing the financial barrier that may have previously limited smaller herds from engaging in weight recording. **If you would like to find out more or get involved please email [laura.eyes@ahdb.org.uk](mailto:laura.eyes@ahdb.org.uk).**

EBV / Index	Explanation	Interpretation
<b>Birth Weight</b>	The genetic potential of calf birth weight. Negative values indicate cattle that will produce smaller calves. High values are more likely to be associated with difficult calvings	Negative values = lighter calves born
<b>Calving Ease (Direct)</b>	Estimates the percentage of unassisted calvings that will be derived when using a particular sire.	Positive values = more unassisted calvings
<b>200 Day Weight</b>	Genetic potential for growth to 200 days of age.	Positive values = faster growth rates
<b>400 Day Weight</b>	Genetic potential for growth to 400 days of age. Selection for faster growth will result in animals that have heavier carcasses at a constant fat class or leaner carcasses at a constant age. However, selection for higher growth rates may result in higher birthweights and mature size.	Positive values = faster growth rates
<b>Muscle Depth</b>	Selecting for this trait will increase the yield of lean meat in the carcase.	Positive values = deeper loin muscles
<b>Fat Depth</b>	Indicates animals capable of producing leaner carcasses, which can be taken to heavier carcase weights without becoming overfat.	Negative values = leaner carcasses

### Breeding Indexes

Whilst EBVs aid the selection of cattle for specific traits, they can be combined into breeding indexes using economic weightings to meet broader breeding objectives.

- **Calving Value** – Highlights bulls whose calves will be born easily
- **Beef Value** – Identifies superior cattle for growth and carcass traits
- **Maternal Value** – Indicates the best bulls for maternal traits, like milk production and longevity, which are important when breeding female replacements

### Accuracy values

An accuracy value is published with every EBV; they indicate how close an EBV is to the animal's true genetic merit. Accuracy values are influenced by the amount of data recorded for an animal and their relatives. Unrecorded cattle will have low accuracy values until their progeny have been performance recorded and this will be reflected in their EBVs.
